

# United States 1986

## 1 Survey Description

**Survey:** The Panel Study of Income Dynamics (PSID) is the longest longitudinal household survey in the world. The Study started in 1968 and is currently being developed by the University of Michigan. It includes data related to employment, income, wealth, expenditures, health, marriage, childbearing, child development, philanthropy, education, and other topics. This document refers specifically to the data collected in 1986.

**Link to the document:** <https://simba.isr.umich.edu/data/data.aspx>

**Sample:** The sample of the PSID was originally composed of approximately 18,000 people in 5,000 households, making it a representative sample of the entire country. This sample was complemented with a non-representative oversample of low-income families to facilitate the investigation of issues related to poverty and vulnerability. Over the years, the sample size has changed as the number of members in the families considered originally has grown. There are 9,088 individuals in the total sample and 5,803 individuals in the analysis sample. Section 3 of this document describes the prevalence and pattern of missing data.

**Weights:** Population weights are computed as the ratio between specific weights for the Panel Study of Income Dynamics (PSID) and the Current Population Survey (CPS). These weights, based on sex, age, and ethnicity, are tailored for different demographic groups. Age groups are formed, and missing values are imputed using historical data. The process ensures a more representative combined dataset for analysis.

**Outcome:** The outcome variables are annual equivalized household disposable total (*eq\_iinc*) income in dollars PPP 2017.<sup>1</sup>

**Circumstances:**

- Race 'ethnicity'(white, black, american indian, aleut, eskimo, asian, pacific islander, hispanic and others described in Table 1)
- Sex (female, male)
- Region of upbringing (6 categories described in Table 1)
- Fathers's edu. (years of education, described in Table 2)
- Mother's edu. (years of education, described in Table 2)
- Father's occ. (3 categories, High: includes ISCO 1, 2 and 3, Medium: includes ISCO 4, 5 and 6, and Low: ISCO 7, 8, 9 and 0, described in Table 3)
- Mother's occ. (3 categories, High: includes ISCO 1, 2 and 3, Medium: includes ISCO 4, 5 and 6, and Low: ISCO 7, 8, 9 and 0, described in Table 3)

---

<sup>1</sup>Income variable was equivalized using the square root scale.

## 2 Descriptive Statistics

Table 1: Respondant's socio-demographics - 1986

	Analysis sample	Total sample
	(N=5,803)	(N=9,088)
<b>Gender</b>		
0 Female	3,715 (64.0%)	5,132 (56.5%)
1 Male	2,088 (36.0%)	3,956 (43.5%)
<b>ethnicity</b>		
1 White	3,881 (66.9%)	5,486 (60.4%)
2 Black	1,715 (29.6%)	3,301 (36.3%)
3 Am. Indian, Aleut, Eskimo	100 (1.7%)	128 (1.4%)
4 Asian, Pac. Islander	21 (0.4%)	33 (0.4%)
5 Hispanic	39 (0.7%)	56 (0.6%)
7 Other	47 (0.8%)	84 (0.9%)
<b>Region of upbringing</b>		
1 Northeast	1,028 (17.7%)	1,485 (16.3%)
2 North central	1,643 (28.3%)	2,264 (24.9%)
3 South	2,414 (41.6%)	4,146 (45.6%)
4 West	616 (10.6%)	948 (10.4%)
5 Alaska, Hawaii	1 (0.0%)	3 (0.0%)
6 Foreign country	101 (1.7%)	139 (1.5%)
Missing	0 (0%)	103 (1.1%)

Table 2: Parental education - 1986

	N	Mean	SD	Median	Min	Max	Missing
Analysis sample - Mother's edu	5,803	3.529	1.961	3	0	8	0
Analysis sample - Father's edu	5,803	3.628	1.712	4	0	8	0
Total sample - Mother's edu	9,088	3.434	1.939	3	0	8	359
Total sample - Father's edu	9,088	3.540	1.708	4	0	8	309

Table 3: Parental occupation - 1986

	Analysis sample	Total sample
	(N=5,803)	(N=9,088)
<b>Father's occupation (ISCO)</b>		
1 Low	2,563 (44.2%)	4,271 (47.0%)
2 Middle	2,152 (37.1%)	3,325 (36.6%)
3 High	1,088 (18.7%)	1,420 (15.6%)
Missing	0 (0%)	72 (0.8%)
<b>Mother's occupation (ISCO)</b>		
1 Low	4,399 (75.8%)	4,562 (50.2%)
2 Middle	471 (8.1%)	487 (5.4%)
3 High	933 (16.1%)	956 (10.5%)
Missing	0 (0%)	3,083 (33.9%)

Table 4: Respondant's income - 1986

	N	Mean	SD	Median	Min	Max	Missing
Analysis sample	5,803	36,627	27,522	31,622	50.12	504,248	0
Total sample	9,088	34,623	25,806	30,080	50.12	504,248	0

### 3 Missing data analysis

#### 3.1 Missing patterns

Figure 1: Missing patterns: *Left*: Marginal distribution of missing observations per variable. *Right*: Combination of missingness across cases

#### 3.2 Differences in expected total equivalized household income between samples

Figure 2: Differences in expected total equivalized household income between the sample with non-missing circumstances and the total sample

### 3.3 Gini coefficient

Table 5: Gini coefficient in analysis sample and total sample

Wave	Sample	Gini	Lower bound	Upper bound	Average income
Wave 1986	Analysis sample	0.333	0.343	0.363	32,252
Wave 1986	Total sample	0.338	0.354	0.371	29,539

### 3.4 Differences in Gini coefficient between samples

Figure 3: Differences in Gini coefficient between the sample with non-missing circumstances and the total sample
