

# United States 1992

## 1 Survey Description

**Survey:** The Panel Study of Income Dynamics (PSID) is the longest longitudinal household survey in the world. The Study started in 1968 and is currently being developed by the University of Michigan. It includes data related to employment, income, wealth, expenditures, health, marriage, childbearing, child development, philanthropy, education, and other topics. This document refers specifically to the data collected in 1992.

**Link to the document:** <https://simba.isr.umich.edu/data/data.aspx>

**Sample:** The sample of the PSID was originally composed of approximately 18,000 people in 5,000 households, making it a representative sample of the entire country. This sample was complemented with a non-representative oversample of low-income families to facilitate the investigation of issues related to poverty and vulnerability. Over the years, the sample size has changed as the number of members in the families considered originally has grown. There are 8,716 individuals in the total sample and 6,189 individuals in the analysis sample. Section 3 of this document describes the prevalence and pattern of missing data.

**Weights:** Population weights are computed as the ratio between specific weights for the Panel Study of Income Dynamics (PSID) and the Current Population Survey (CPS). These weights, based on sex, age, and ethnicity, are tailored for different demographic groups. Age groups are formed, and missing values are imputed using historical data. The process ensures a more representative combined dataset for analysis.

**Outcome:** The outcome variables are annual equivalized household disposable total (*eq\_iinc*) income in dollars PPP 2017.<sup>1</sup>

**Circumstances:**

- Race 'ethnicity'(white, black, american indian, aleut, eskimo, asian, pacific islander, hispanic and others described in Table 1)
- Sex (female, male)
- Region of upbringing (6 categories described in Table 1)
- Fathers's edu. (years of education, described in Table 2)
- Mother's edu. (years of education, described in Table 2)
- Father's occ. (3 categories, High: includes ISCO 1, 2 and 3, Medium: includes ISCO 4, 5 and 6, and Low: ISCO 7, 8, 9 and 0, described in Table 3)
- Mother's occ. (3 categories, High: includes ISCO 1, 2 and 3, Medium: includes ISCO 4, 5 and 6, and Low: ISCO 7, 8, 9 and 0, described in Table 3)

---

<sup>1</sup>Income variable was equivalized using the square root scale.

## 2 Descriptive Statistics

Table 1: Respondant's socio-demographics - 1992

	Analysis sample	Total sample
	(N=6,189)	(N=8,716)
<b>Gender</b>		
0 Female	3,778 (61.0%)	4,922 (56.5%)
1 Male	2,411 (39.0%)	3,794 (43.5%)
<b>ethnicity</b>		
1 White	4,195 (67.8%)	5,421 (62.2%)
2 Black	1,783 (28.8%)	3,007 (34.5%)
3 Am. Indian, Aleut, Eskimo	107 (1.7%)	128 (1.5%)
4 Asian, Pac. Islander	21 (0.3%)	28 (0.3%)
5 Hispanic	34 (0.5%)	46 (0.5%)
7 Other	49 (0.8%)	86 (1.0%)
<b>Region of upbringing</b>		
1 Northeast	1,100 (17.8%)	1,441 (16.5%)
2 North central	1,789 (28.9%)	2,217 (25.4%)
3 South	2,516 (40.7%)	3,860 (44.3%)
4 West	693 (11.2%)	962 (11.0%)
5 Alaska, Hawaii	1 (0.0%)	2 (0.0%)
6 Foreign country	90 (1.5%)	115 (1.3%)
Missing	0 (0%)	119 (1.4%)

Table 2: Parental education - 1992

	N	Mean	SD	Median	Min	Max	Missing
Analysis sample - Mother's edu	6,189	3.738	2.012	4	0	8	0
Analysis sample - Father's edu	6,189	3.812	1.745	4	0	8	0
Total sample - Mother's edu	8,716	3.669	1.995	4	0	8	324
Total sample - Father's edu	8,716	3.758	1.743	4	0	8	220

Table 3: Parental occupation - 1992

	Analysis sample	Total sample
	(N=6,189)	(N=8,716)
<b>Father's occupation (ISCO)</b>		
1 Low	2,603 (42.1%)	3,857 (44.3%)
2 Middle	2,258 (36.5%)	3,158 (36.2%)
3 High	1,328 (21.5%)	1,592 (18.3%)
Missing	0 (0%)	109 (1.3%)
<b>Mother's occupation (ISCO)</b>		
1 Low	4,479 (72.4%)	4,666 (53.5%)
2 Middle	506 (8.2%)	527 (6.0%)
3 High	1,204 (19.5%)	1,248 (14.3%)
Missing	0 (0%)	2,275 (26.1%)

Table 4: Respondant's income - 1992

	N	Mean	SD	Median	Min	Max	Missing
Analysis sample	6,189	40,078	43,709	32,049	31.40	1,004,488	0
Total sample	8,716	38,295	42,908	30,944	7.77	1,004,488	0

### 3 Missing data analysis

#### 3.1 Missing patterns

Figure 1: Missing patterns: *Left*: Marginal distribution of missing observations per variable. *Right*: Combination of missingness across cases

#### 3.2 Differences in expected total equivalized household income between samples

Figure 2: Differences in expected total equivalized household income between the sample with non-missing circumstances and the total sample

### 3.3 Gini coefficient

Table 5: Gini coefficient in analysis sample and total sample

Wave	Sample	Gini	Lower bound	Upper bound	Average income
Wave 1992	Analysis sample	0.379	0.380	0.413	35,818
Wave 1992	Total sample	0.387	0.391	0.419	33,244

### 3.4 Differences in Gini coefficient between samples

Figure 3: Differences in Gini coefficient between the sample with non-missing circumstances and the total sample
